

Leslie Canham is a speaker specializing in Infection Control, OSHA Compliance, Dental Practice Act and HIPAA regulations. In dentistry since 1972, Leslie has worked as dental assistant, treatment coordinator, and office manager. Leslie has since formed a successful business, Leslie Canham and Associates, providing in-office training, mock-inspections, consulting, online home study seminars and webinars. Leslie's goal is to help the dental team navigate the sea of state and federal regulations by providing up to date and accurate information.

Leslie's live seminars are fast paced, entertaining and have earned her the reputation as an outstanding speaker in dentistry. Leslie is recognized as a continuing education provider by the California Dental Board. Leslie is also authorized by the Department of Labor as an OSHA Outreach Trainer in General Industry Standards.

Leslie's memberships include: The Organization for Safety, Asepsis and Prevention, The Speaking, Consulting Network, The Academy of Dental Management Consultants, The California Dental Assistants Association, The California Association of Dental Assistant Teachers, The California Dental Association and the National Speakers Association.

Dental Background

Leslie began her career in dentistry in working as a dental assistant for her father, a dentist. Leslie's experience gives her first hand knowledge of dental office operations from both the employee and employer perspective. Learning all aspects of running a dental office, Leslie gained an "in the trenches" understanding what it takes to work in both the administrative and clinical areas of a successful dental practice. When Leslie's father sold his dental practice in 1982, she worked as a temporary receptionist and assistant for several dentists. Soon the demand for her temporary services gave Leslie the idea to open a dental employment agency. Leslie recruited, interviewed and placed dentists, dental hygienists, dental assistants, and front office personnel in temporary and permanent jobs. Leslie was able to match the employee to the employer by her unique perspective of what employers and employees want from working together. Within six years Leslie sold her business and moved to northern California where she worked for a local dentist. When Leslie was assigned the task of "OSHA Coordinator", she immediately saw a need to simplify the complex regulations. One of her responsibilities was to set up and present the OSHA safety program. This presentation was the beginning of Leslie's speaking career.
